I am writing on behalf of the Caversham and District Residents Association. We do not object to the principle of conversion but have some specific concerns. The front garden/ drive area becomes an unrelieved car park for 10 cars. This is out of character with an area of individual properties with front gardens and a much more sensitive layout and landscaping is needed. Large mature trees in this area at the top of the escarpment are of great importance and should be retained for the benefit of the immediate area and, importantly, to protect views of the skyline including the protected views from St Peters Conservation Area.
