I am commenting on behalf of Caversham and District Residents Association. CADRA welcomes this scheme. It is a sensitive adaptation to the predominantly terraced housing of the surrounding area, echoing its built form and some design elements but with a fully modern interpretation and with due regard to the nearby Listed building. It also provides off-street parking for all but one house, avoiding a perennial problem in areas like this. It should be an exemplar for such infill on the various under-performing sites in this area.

Our only suggestion for improvement is the provision of EV charging points. Given the levels of pollution in this area, every encouragement should be given to this form of transport.
